

Tomo Katsurada & Jonny Nash are two artists known for their deeply melodic, exploratory approaches to guitar-led music. Tomo Katsurada, widely recognised for his work with Kikagaku Moyo and his solo releases, and Jonny Nash, solo artist and founder of the Melody Is Truth label, both operate in a space where song, atmosphere, and abstraction gently overlap.

After admiring each other's work for years, the pair began working together in 2024, having become friends while living in Amsterdam. Their first collaboration came when Tomo invited Jonny to play on his debut solo EP *Dream of the Egg*, followed by Jonny joining Tomo's live performances for the project. What began as a one-off collaboration quickly developed into a close creative relationship, built on a shared musical language and mutual interest in the possibilities of expression with a simple set-up of two guitars, cello and voice.

Their live performances balance composed structure with improvisation; the music is guided by an underlying framework that allows space for spontaneity, interaction, and delicate control of dynamics. Guitars intertwine and unfold in evolving patterns, creating music that feels intimate, timeless, and quietly expansive—aiming for a sense of transcendence rooted in human interaction.

Tomo and Jonny will release their first album, *'At The Emerald Pool'* on Melody As Truth / Future Days Radio in June 2026.
